SEAT BELT EXPIRY CLARIFICATION

This Notice is to clarify seat belt expiry dates as there are now 2 types of SFI labels in use as shown in the photo below.

Labels produced Prior to 2017 (displayed on the left) are good for 4 years from the punched month and year on the tag.

- For example: “May” punched and “16” punched indicates a manufacture date of May 2016 therefore the belts would expire at the end of May 2020

Labels available as of January 1, 2017 (displayed on the right) are good for 2 years from the date displayed on the tag.

- For example: “Jun 2019” indicates the belts would expire at the end of June 2021

NOTE: The new labels reflect the 2 year expiry term that is standard in many forms of racing. As QMA has elected to utilize a 4 year expiry term it is necessary to add 2 years to the displayed date on the label to determine the QMA expiry date.
