The QMA National Board would like to clarify the side panel rule due to safety reasons. Please be sure that you read the following rule and check your cars for compliance.

**Side Panel Rule**

4. (I) All cars must have side panels on both sides of the cockpit and engine compartment. The right side panel must completely cover engine flywheel fan and must have a 2” min. diameter hole to access flywheel nut for sealing purposes. The left side panel must completely cover gearbox.
